## WHAT DOES GIG ECONOMY TECHNOLOGY MEAN FOR STAFFING?

Forces us to think differently...

- Pushes us to streamline our process
- Challenges us to design for mobile first
- Forces us to reduce the barriers of entry
- Allows us to leverage the mobile experience to include expected features and functions

41

---

---

---

---

---

---

---

---

---

---

## HOW CAN WE COMPETE AGAINST THE GIG ECONOMY SPACE?

---

---

---

---

---

---

---

---

---

---

Make it work to our advantage by realizing what differentiates us:

- Human interaction
- Payroll or billing specialist
- Public concerns on hiring staff directly (we are employers not agents)
- Compliance for worker classification, exempt, nonexempt, SOW
- Client branding

---

---

---

---

---

---

---

---

Adopt key gig economy elements that allow us to interact with our clients and candidates more easily

- Create a streamlined application process
- Adopt an open platform allowing:
  - Clients to enter orders and search our database for talent
  - Talent to search our database for positions
- Create an easy pay/bill interface
- Leverage Millennials

---

---

---

---

---

---

---

---

- Look for bolt-ons to your existing software package to provide some of this functionality:
  - Online applications
  - Online ordering
  - Direct deposit, pay card/pay bill payments
  - PDF billing, credit card billing
- Consider white-label full online marketplace solutions (e.g., OnForce)

---

---

---

---

---

---

---

---

## ROUNDTABLE DISCUSSIONS

- Three main topics
  - Sales
  - Recruiting
  - Gig economy
- Presenters will do a deep dive into their presentations at their tables.
- You will get to visit three tables
- Approximately 14 mins each
- We'll reconvene as a group to wrap up at the end

---

---

---

---

---

---

---

---

## WRAP-UP

Share what you learned?  
What stood out?  
What are your takeaways?
