- E4—Idea Lab (Booth 1206)

QUESTIONS? Text 703-253-2020 and a member of the ASA staff will respond within minutes!

Welcome to the

STAFFING WORLD® 2017

Oct. 24-26 ■ Chicago, IL

Brought to you by the

ASA American Staffing Association

**WELCOME TO THE STAFFING WORLD TECH PARK!** It is the first-of-its-kind center of technology solutions specific to the staffing, recruiting, and workforce solutions industry. Here you can discover, learn about, and discuss the tools, systems, and platforms that can boost your company’s efficiency and productivity today, as well as those that can potentially transform the way you do business tomorrow.

The Tech Park is part of a broad ASA strategic initiative to provide members with targeted and timely information about technology solutions that can enhance their business operations. ASA is mapping the staffing technology landscape and disseminating content in several ways: focused coverage in its publications, including *Staffing Success* and *Staffing Today*; a special series of technology solutions webinars; a new online technology center for the staffing and recruiting industry—debuting in 2018—and Tech Park 2.0 at Staffing World 2018.

Let ASA know what you think about this year’s experience. Share feedback on social media using the hashtag #swtechpark and be sure to complete the survey you’ll receive via email after Staffing World. Enjoy the Tech Park!

**THE ESSENTIAL ELEMENTS OF STAFFING TECHNOLOGY**

ASA contracted Talent Tech Labs to curate this selection of technology solutions for their potential to transform the staffing and recruiting industry today—and reimagine it for tomorrow. The solutions are organized into three broad stages—Source, Engage, and Hire—and presented in 12 vertical categories, each ranked on a continuum. That continuum ranges from “additive” technologies—those that increase value to users in current staffing models—to “disruptive” technologies—those with the potential to upend current models and usher in new staffing and recruiting paradigms. The logos within the tiles represent leading companies within each segment.

Technologies on the + side of the slider enhance current staffing models. Those toward the ⚡ side of the slider have the potential to disrupt current models.

THE ESSENTIAL ELEMENTS OF STAFFING TECHNOLOGY

As of Oct. 20, 2017. Subject to change.

This diagram serves as a discovery and discussion tool to help industry leaders better understand technology's role in staffing, present and future.
