Home - ASA Staffing Tech Center Tech Stack Analysis Tool M

RESULTS ANALYSIS OF THIS IS DAVID F, TESTING THE PRODUCT () SHE Supermassive Aggressive Generalist Staffing

Congrats, you are among a handful of the largest, most complex stalling firms in the world. You will need many different technologies to support different business units and regions, and your main challenges will be rationalizing investments, integrating the many tech solutions together, and having a unified data architecture.

Overview

Your Customized Tech Stack

With multiple occupational specialities and bespoke workflows, you'll likely need multiple technology stacks and sourcing channels to support different business units (many of which are likely independently larger than most staffing firms). You will need to manage the need for such specialization against the need for a standard "operating platform" and data structure:

You are a proactive technology adopter, and have the resources to make substantial beta and investments. Your challenge will be making sure you are actually making the right beta, prioritizing correctly, and not just investing in tools for PK's sake. That said, you'l likely be ahead of peers on emerging trends and business models, and the technology that undeprise. Xou will also be uniquely positioned to advice clients on tech strategy, and may have a leg up in viscous consources dealse with you technological edue.

What to Prioritize

Tech stack rationalization by business unit/geography, integrating solutions and unilying data, digital "storefront" mareketplace experience for candidates/clients across occupations

What to Consider

An in-house (or external) venture fund, launching new business models, opportunistically acquiring additive or disruptive technology.

What's next?

Your report has been saved to your myASA page, so you can revisit it any time. You can also update your form submission as needed—simply click here to update this analysis.

Sales Intelligence >

Top Technology for your Tech Stack

Sales Technology

Geographic Data Analytics

Challenge #1: I want to expand into new territories, but I don't know where the most demand is, and if there is enough of a talent pool for us to be successful.

Challenge #2: I have multiple salespeople and need to divide up sales territories, but don't know the most equitable way to do it.

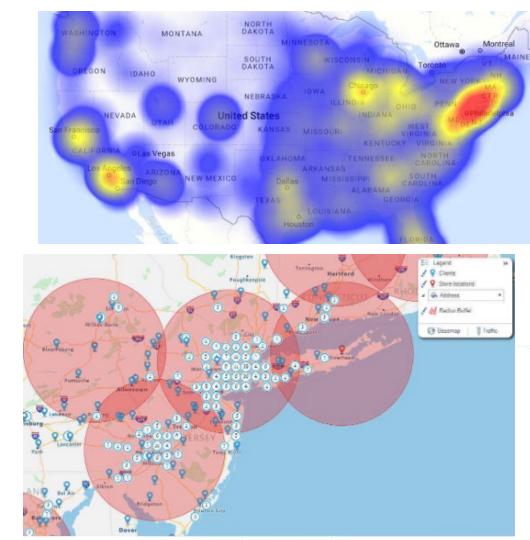

Real World Applications

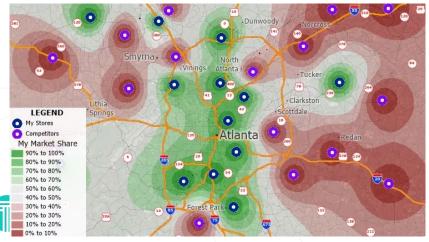

- Analyze potential new markets and skill sets
- Equitably divide sales territories
- Target sales and recruiting efforts
- Present valuable market data to prospects and clients
- Analyze potential new markets for prospects, candidates, and competition
- Determine optimal areas for brancl location/relocation
- Assist clients in analyzing potential new locations, recruiting avenues

- Heat and Bubble Mapping
- Territory Management
- Data Layering
- Upload tool for real time updates via Salesforce.com, ZoomInfo, Excel, ZOHO, BI tools, etc.

Sales Engagement

Challenge: My sales team needs a more structured process, but my ATS/CRM doesn't provide the structure I need (or is too complicated to gain high adoption).

BLOOBIRDS

Sales engagement

- O Dialer with local presence and call recording.
- Native integration for Aircall and JustCall.
- Email productivity (Gmail and Outlook integration)
- O Linkedin message and lead capture Plugin
- Automatic cadence
- Native support for both Account Based and Lead Based Sales
- Real time engagement signals (web & mail)
- O Native integrations Hubspot, Salesforce and € 10 Performance Contract Salesforce and € 10 Performance Contract Salesforce and € 10 Performance Contract Salesforce Contract Salesfor Dynamics 365
- ⊘ Zapier connector and REST API for other CRMs & MAPs
- Reporting and management tools

≡≡

Playbook and content management

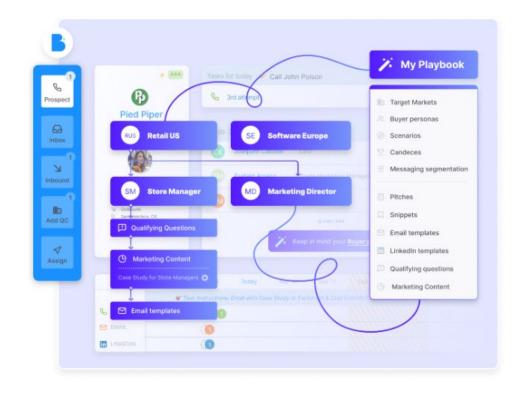

- O Target markets, target personas, scenarios
- Profiling guestions and gualifying guestions
- Rating model
- Recommendation engine for pitch-snippets, template-snippets and questions
- Ocontent management
- O Built-in prospecting and sales processes
- O Conversational experience for data gathering
- Strategic analysis: Go To Market Metrics

😑 🛛 🎔 Sales Managers

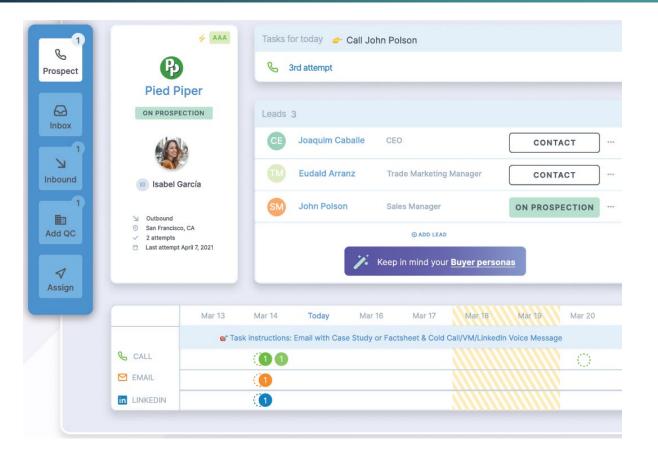

Built-In Sales Playbook

Your GTM Strategy, processes, value prop, pitch, etc. are not in a Powerpoint anymore. They are now live and actionable in Bloobirds. What's the output? Precision and better insights.

Learn more ->

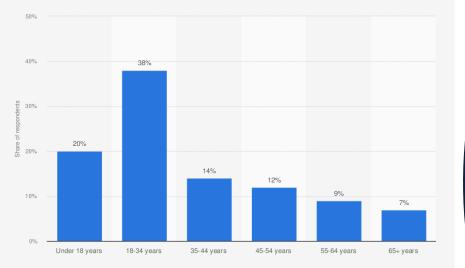

Gamification

Challenge #1: KPIs and commission are great for achieving minimum goals, but I'm looking for more ways to drive performance that are fun, engaging, and sustainable.

Challenge #2: More and more of my team is working remote, but I want to maintain a strong culture, interaction, and sense of belonging.

Distribution of video gamers in the United States in 2021, by age group

Sources Entertainment Software Association; Ipsos © Statista 2022 Additional Information: United States; Ipsos; February 2021; 4,000 respondents

TALENT TECH LABS

Video Games are big - real big

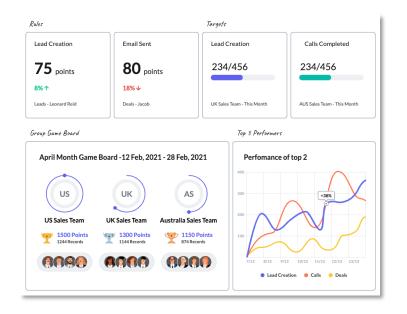

- Over 200 mm video gamers in the US
- 70% of gamers are 18+
- 38% are 18-34
- 60% of Americans play video games daily
- Mobile game revenue will exceed \$100b in 2023
- Console revenue \$73b in 2022
- Future Employees are learning through Gamification - Dreambox

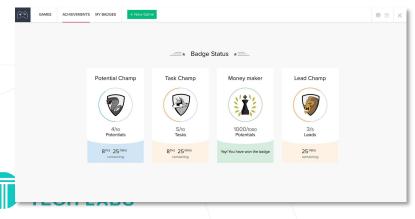

What is Gamification?

Gamification is about taking something that is not a game and applying game mechanics to increase user engagement, happiness and loyalty.

- Robust integration list including Bullhorn, JobAdder, MS Teams, Hubspot, and Power BI

Top Technology for your Tech Stack

Recruiting Technology

Agenda

What are we covering today?

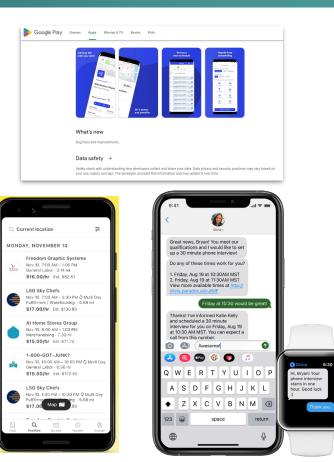

- Mobile app strategy
 - App vs no app
 - \circ Texting
- Al-based matching
 - Tools
 - Regs
- Change Management Tech
- Staffing Analytics
- Interview intelligence
- Onboarding / offboarding
- Geofencing

Technology can level the playing field

Mobile App Strategies

Methods of Mobile Delivery

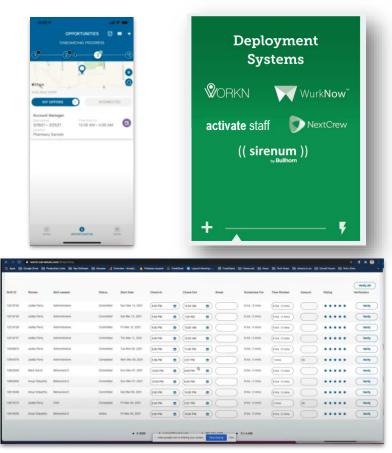

- Mobile phone application
 - Self-developed / proprietary
 - Deployment platform
- Progressive Web Apps (PWA)
 - A website that looks / feels like an "app" but doesn't require an install
- SMS-based interaction
 - Chatbot
 - 1:many texting

Mobile App Strategies: Deployment Systems

Deployment Systems

- **Core Features:** Downloadable app, opt-in shift management / self-selection, on-demand job distro, in-app comms & real-time workforce management, direct client enablement.
- **Pros:** Differentiated experience, higher fill rates and better candidate utilization, marketplace dynamics, significantly cheaper than building custom.
- **Cons:** Less control on roadmap / customization, optimized for certain occupational segments (shift-based, hourly). Can be difficult to fully operationalize and ROI can be elusive if not implemented / rolled out effectively.
- **Final Thoughts:** Great play for staffing firms interested in benefits of marketplace / on-demand technology but don't want to develop in-house.

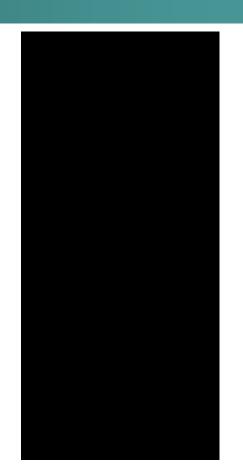

30

Mobile App Strategies: PWA

Progressive Web Applications

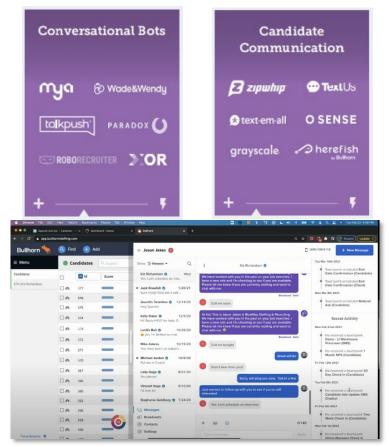

- **Core Features:** Look, feel, & functionality of an app without requiring a download.
- **Pros:** Lighter development lift, maintenance, device conformity, compliance, & no revenue share.
- **Cons:** Still requires custom development, potentially less "cool factor" / credibility than having something on the app store.
- **Final Thoughts:** Great, accessible middle ground for deploying candidate or client facing mobile functionality without having to build a full-fledged mobile app that complies to multiple app stores.

Mobile App Strategies: Chatbots & Texting

Chatbots & Texting

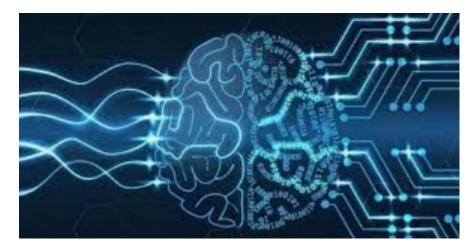

- **Core Features:** Conversational interface in between agency and candidate.
- **Pros:** Cost effective, pricing based on consumption and no need for custom development. Higher engagement/ response vs. email.
- **Cons:** Less "functional" than a mobile application, and less candidate / client "capture and buy-in" vs. a mobile app.
- **Final Thoughts:** This is a core functional capability that every staffing firm should have in its toolbox.

AI-based Matching

The Business Case

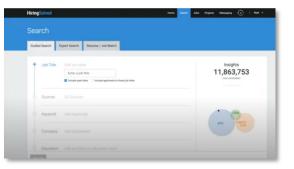

- Efficiently working through inbound applicants
- Discovering undiscovered "hidden gems" in the applicant pool
- Rediscovery and reutilization of existing candidates
- **Final Thoughts:** Great, accessible middle ground for deploying candidate or client facing mobile functionality without having to build a full-fledged mobile app that complies to multiple app stores.

AI-based Matching: Examples

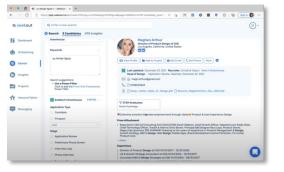

HiringSolved

- Guided search & match
- Resume to job match (multi-req matching)
- Voice assistance
- DEI Inference

HireEz | Seekout

- External sourcing-focused (LI on steroids)
- External & internal search
- Advanced market analytics
- Contact info & data refresh
- DEI Inference

Sourcebreaker

- Bullhorn native integration post acquisition
- Can be used for internal match and business development
- Everything you'd need, nothing you don't

AI Regulations

Current State

- Senators write letter to EEOC in 2020
- Called on EEOC to determine its oversight and capabilities relating to technology and AI in hiring processes.

United States Senate Washington, D.C. 20510

December 8, 2020

The Honorable Janet Dhillon Chair Equal Employment Opportunity Commission 131 M Street N.E. Washington, D.C. 20507 Hiring technologies include a range of tools used in the employee selection process to manage and screen candidates after they apply for a job.³ They include new modes of assessment, such as gamified assessments or video interviews that use machine-learning models to evaluate candidates, as well as other instruments, such as general intelligence or personality tests, coupled within modern applicant tracking systems.⁴

While hiring technologies can sometimes reduce the role of individual hiring managers' biases, they can also reproduce and deepen systemic patterns of discrimination reflected in today's workforce data.⁵ Today, Black and Latino workers are experiencing significantly higher

Today, far too little is known about the design, use, and effects of hiring technologies. Job applicants and employers depend on the Commission to conduct robust research and oversight of the industry and provide appropriate guidance. It is essential that these hiring processes advance equity in hiring, rather than erect artificial and discriminatory barriers to employment. Accordingly, we request information about the Commission's authority and capacity to conduct the necessary research and oversight to ensure equitable hiring throughout the economic recovery and beyond.

AI Regulations

Current State

- EEOC responded with guidance for ADA compliance in May 2022
- Employers encouraged to disclose use of AI and traits being measured, to ensure reasonable accommodations
- Examples given of how otherwise predictive / validated assessments could affect individual disabled applicants

AI Regulations

Current State

- 2019 Illinois passes AI Video Interview Act
- **2020** Maryland law on facial recognition technology in hiring goes into effect
- **2023** NYC law goes into effect prohibiting use of "automated employment decision tools" in hiring unless an audit has been performed.
 - O Logistical parts of law still need to be clarified e.g. "10 day notice requirement" and what constitutes a compliant audit and who is responsible / can provide (vendor or client)

AI Regulations

Best Practices

- No national framework for AI in hiring specifically (yet). Current approach (jurisdiction by jurisdiction) unfavorable for a variety of reasons.
- Overarching national framework is Title VII, which applies to all employment selection criteria (AI-based or not).
- Recognition from regulators that technology has an important role to play in fair, equitable and scalable hiring processes.
- Tools closer to requirements of the job more defensible
- Employers should audit all selection processes on annual basis at a minimum

AI Regulations

Emerging Ecosystem Category for AI Compliance

AI and Algorithm Audit Platforms

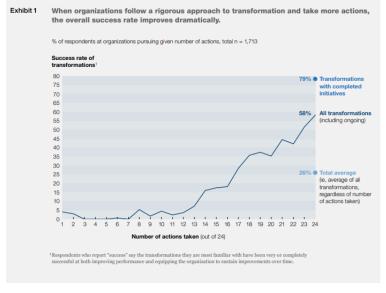

New category of solution emerging that audits AI-based systems and detects and measures model drift, bias, and impact.

Change Management & Digital Adoption

Most Important Work Happens AFTER a Tool is Purchased

- Correct implementation
- Communication, capability building & change activities
- User training, upskilling & change management
- Change activities make or break the success of a technology investment

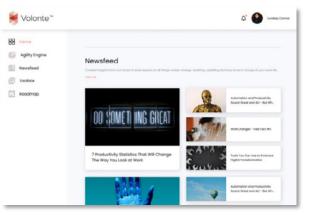

Source: McKinsey, "How to Beat the Transformation Odds"

Change Management & Digital Adoption

Volonte.co

- Systematically manage & track change initiatives and activities
- Disseminate learning & upskill employees
- Empower the right users across the organization to become adopters and advocates & foster collaboration
- Make your tech investments successful

Staffing Analytics

Why Analytics?

- ATS primarily systems of record. Not necessarily designed for optimal workflow management or user-accessible reporting.
- Highlighted by the physical "whiteboard" in most staffing firm sales pits.
- Movement from "KPIs" to "help me do my job better"
- Aha moment was seeing recruiters log in and manage their day via an "analytics dashboard"

Actionable Analytics

Monster Data Feed

M

Problem:

It's time-consuming to identify new, active candidates that are a fit for your jobs. Sourcing manually is more costly and reactive.

Solution:

Monster's Data Feed allows you to automatically receive a fresh list of new candidates that match jobs you are trying to fill on a regular basis – allowing you to be proactive and engage with candidates before your competitors.

Monster's Data Feed

How It Works:

- Define your candidate criteria -role, location and/or skills
 - Example: Developers in Boston, MA with Java Expertise
- Every day, we will find active and unique candidates in Monster's database that match your requirements
- Upload matching candidates into your ATS or hiring system

The Recruiter column shows the source, which is the Resume Feed

The Status column shows that the candidate is a New Lead

Problem

Recruiters need the ability to find and hire top talent on-the-go.

Solution

Recruit from anywhere, anytime, with the JobAdder ATS mobile app.

Easily swipe to progress candidates, set smart reminders, add voice-to-text notes, do real-time scheduling, team collaboration, and much more.

THE PROBLEM

Staffing needs a way to infuse communications and notifications throughout the talent lifecycle to drive engagement, retention, and loyalty.

OUR SOLUTION

Avionté PIXEL helps automate repetitive, lowvalue tasks so staffing can focus on impactful talent interactions.

HOW CONVERZAI IS HELPING RECRUITERS

Conversations with candidates through our Voice platform typically last anywhere between 6 to 21 mins.

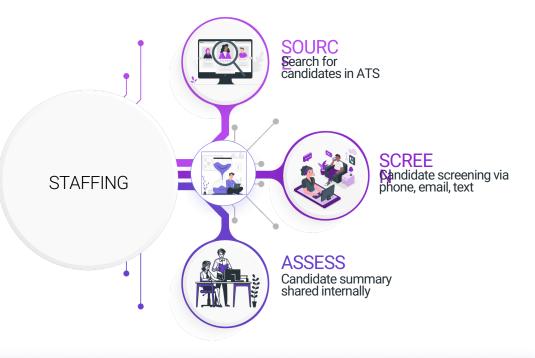

Problem:

- Boosting topline with your existing team
- Ghosting and poor candidate experiences

Solution:

The Voice Al Platform for Scaling Candidate Engagement

The platform automatically sources candidates from the ATS, engages and follows up with candidates on multiple jobs concurrently and delivers deep insights in seconds.

Certification Management Module

<u>Challenge</u>

Due to unprecedented events like the COVID-19 pandemic, businesses are being required to maximize administrative operations to maintain both workplace safety and regulatory compliance; managing digital certifications, licenses, and applicable documents.

Solution

The Greenshades Certification Management module allows companies to comply with city, state, and federal guidelines involving vaccinations, licenses, and certifications. Delivering all the functionality needed to create, manage, and maintain employee credentials of any kind.

Greenshades.com

Sense Discover

Problem: Nearly half of recruiters' time is spent on cold, ineffective outreach because they are not able to identify the right candidates for the right jobs without manual work and countless hours.

Solution: Reduce friction in the application funnel, increase placements, and improve margins by integrating job-matching with automated engagement.

The Problem:

Agencies need to meet the evolving needs of candidates

The Solution:

ActivateStaff's seamless mobile scheduling experience

Problem:

- Can't find fillable reqs
- Not sure what a competitive wage would be
- No idea what skills should be included
- Can't see who is competing for the same talent

Solution:

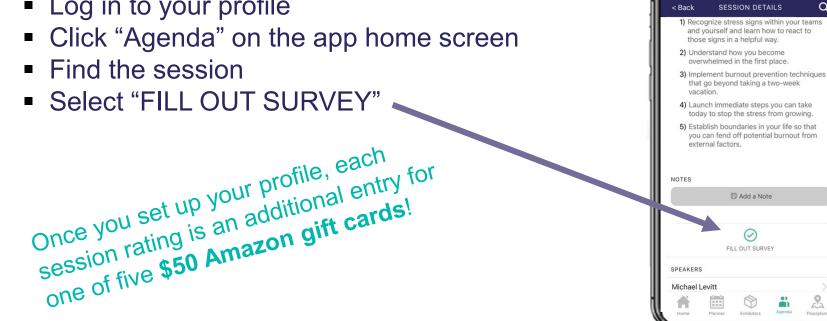

- See hundreds of job postings in a given market and industry
- Understand how difficult a req will be to fill nationally and in your market
- Become an expert on the supply of talent for any job
- Know what pay rate is required
- Discover the demand for any job in any market
