

**Dr. Jason Meyer**, founder and owner of Medical Staffing Consultants, Inc., is a well-known expert in the medical staffing and recruitment industry.

Initially trained as a psychologist, Dr. Meyer earned his Ph.D. from Virginia Commonwealth University. Soon afterwards, he began his career as the National Director of New Business Development and Training for Health Force. Career Staff Unlimited, the parent company, and all its divisions, were sold twice, once to AccuStaff, and once to Randstad. Dr. Meyer assisted in the franchising of the Health Force division, and introduced a medical staffing component to these home care offices by launching new programs in nursing and other Allied Healthcare professions. By the time he left this position, the company had grown to 75 offices with over \$100 million in sales. Dr. Meyer then started, and was a partner in two medical staffing companies in New York, before founding MSC.

Since its origination in 2003, Medical Staffing Consultants has helped launch over 275 medical staffing and recruitment companies across the United States. MSC's unique model, including its comprehensive 3-Phase Process, makes it a truly complete consulting service company, the only one of its kind. This has earned MSC the reputation of being "The Industry Expert" by all professional organizations and trade publications within the staffing and personnel industry.

Dr. Meyer personally oversees that MSC clients receive all the necessary training, guidance, and support services they need to launch and operate a successful business. He is always available to clients.

Dr. Meyer remains an active and respected member of the staffing community. He is often a guest speaker at events, such as the American Staffing Association's annual conference, and other industry shows.
